

# Seed Processing Equipment **DASH**

TYPE DASH-40T TYPE DASH-60T

脱種

- All types of seeds can be processed.
- For cleaning of the inside of the machine, threshing drum is mounted on

## Able to handle all sorts of seeds.

- Because the threshing drum and winnowing rotation speed can be set independently, the machine can handle all sorts of seeds
- The powder-shedding plate and the input port can be freely combined according to the sample. (Equipped with inverter.)
- Large peep window gives a good view of the receiving box. Convenient when adjusting air volume.

## Easy to clean!

- Mounting the threshing drum on the top facilitates inspection and cleaning of the inside of the machine.
- Inspection ports (four places) can be used to check the inside of the machine for any residual powder
- Equipped with a damper to facilitate opening and closing.

## Easy to move!

- Equipped with tires to facilitate movement around the field.
- Equipped with retractable handles.
